

JERSEY NUMBER PROTOCOL

We have developed what we believe to be the fairest approach to determining who gets what number. Below is the criteria that our teams should follow. Please note that only players that have made their commitment to the team by making their deposit will be eligible for number retention or choice.

1. Current team player - Players who have been on the team the previous season will retain their number.
2. New players to the team - Once a new player makes their deposit (first paid, first choice), they can pick their number from the available numbers left. If players sign at the same time, the following criteria also applies:
 - a. First - Team Manager's player (If new manager)
 - b. Second - Number of years concurrently with the club
 - c. Third - Draw straws

Please note that Soccer Stores has the ability to change numbers on an existing numbered jersey. However, since the numbers are blue on the white jersey, sometimes it leaves a stain when you remove a number. Please note that if you ask them to do this, it will be at your own risk.

As always, no numbers are allowed over 23.
